The Business of Medicine
Payers

- Self-pay
- Insurance
  - Private (commercial) insurance
    - BCBS
    - Aetna
    - Cigna
    - Etc
  - Government insurance
    - Medicare
    - Medicaid
    - TriCare

Medicare

- Part A – Inpatient hospital care
- Part B – Outpatient medical care
- Part C – Medicare Advantage
- Part D – Prescription drug coverage

RBRVS

- Non-Facility Pricing Amount
  \[(\text{Work RVU} \times \text{Work GPCI}) + \\
  (\text{Transitioned Non-Facility PE RVU} \times \text{PE GPCI}) + \\
  (\text{MP RVU} \times \text{MP GPCI})] \times \text{Conversion Factor (CF)}

- Facility Pricing Amount
  \[(\text{Work RVU} \times \text{Work GPCI}) + \\
  (\text{Transitioned Facility PE RVU} \times \text{PE GPCI}) + \\
  (\text{MP RVU} \times \text{MP GPCI})] \times \text{CF}
Medical Necessity

Services or supplies that:
• are proper and needed for the diagnosis or treatment of your medical condition,
• are provided for the diagnosis, direct care, and treatment of your medical condition,
• meet the standards of good medical practice in the local area, and
• aren’t mainly for the convenience of you or your doctor.

National Coverage Determinations

• National Coverage Determinations (NCD) help to spell out CMS policies on when Medicare will pay for items or services
  – Each Medicare Administrative Carrier (MAC) is then responsible for interpreting national policies into regional policies
  – LCD’s only have jurisdiction within their regional area

Advance Beneficiary Notice

• Providers are responsible for obtaining an ABN prior to providing the service or item to a beneficiary.
  – The form must be filled out in its entirety as well as the cost to the patient and the reason why Medicare may deny the service
  – Only the approved Form CMS-R-131 is valid and the forms may not be altered
HIPAA
- National standards for electronic health care transactions and code sets;
- National unique identifiers for providers, health plans, and employers;
- Privacy and Security of health data.

HITECH
- The Health Information Technology for Economic and Clinical Health Act
  - Promote the adoption and meaningful use of health information technology
  - Strengthened HIPAA
  - Patient audit trail

OIG Compliance Plan
1. Conduct internal monitoring and auditing.
2. Implement compliance and practice standards.
3. Designate a compliance officer or contact.
4. Conduct appropriate training and education.
5. Respond appropriately to detected offenses and develop corrective action.
6. Develop open lines of communication with employees.
7. Enforce disciplinary standards through well-publicized guidelines.

http://oig.hhs.gov/oei/PH/PhysicianEducation/OIGCompliance.asp
NEC vs. NOS

- NEC  Not elsewhere classifiable
  "We know what’s wrong, but there isn’t a specific code for it."
- NOS  Not otherwise specified
  "We aren’t sure what’s wrong."

Punctuation

[ ] Brackets: in tabular enclose synonyms or alternate wording

Example:
008.0 Escherichia coli [E. coli]

// Slanted brackets: in index identifies manifestations and indicates sequence.

Example:
Diabetes, diabetic 250.0 // cataract 250.5 [366.41]
Punctuation

( ) Parentheses: enclose supplementary words that may be present in the description

Example:
Cyst (mucus)(retention)(serous)(simple)

Additional Terms

599.0 Urinary tract infection, site not specified
   Excludes
   candidiasis of urinary tract (112.2)
   urinary tract infection of newborn (771.82)

280 Iron deficiency anemias
   Includes
   anemia
   asiderotic
   hypochromic-microcytic
   sideropenic

Use Additional Code

282.42 Sickle-cell thalassemia with crisis
   Sickle-cell thalassemiawith vaso-occlusive pain
   Thalassemia Hb-S disease with crisis

   Use additional code for the type of crisis, such as:
   acute chest syndrome (517.3)
   splenic sequestration (289.52)
Use Additional Code, if Applicable

416.2 Chronic pulmonary embolism

Use additional code, if applicable, for associated long-term (current) use of anticoagulants (V58.61)

Combination Codes

Single codes:
787.02 Nausea alone
787.03 Vomiting alone

Combination code:
787.01 Nausea with vomiting

Steps to Look Up a Diagnosis Code

1. Find the documented diagnosis
2. Determine the main term
3. Look up the main term in the Index to Diseases (Volume 2)
4. Find the code in the Tabular List (Volume 1)
5. Read all notes associated with the code
ICD-9-CM Official Guidelines for Coding and Reporting

- Section 1
  - A: Coding conventions
  - B: Coding guidelines
  - C: Chapter-specific guidelines

- Sections 2 & 3
  - Inpatient Only

- Section 4
  - UHDDS guidelines for first listed conditions for outpatient and office visits
  

ICD-9-CM Guidelines

Hierarchy of Rules

1. Always follow instructions within ICD-9-CM that are specific to the code.

2. Follow chapter or section instructions when they do not conflict with the individual code instructions.

3. Follow guidelines when they do not conflict with the chapter, section, or individual code instructions.

General Coding Guidelines:

Section I. B.

1. Use of Both Alphabetic Index and Tabular List
2. Locate each term in the Alphabetic Index and Tabular List
3. Level of Detail in Coding
4. Code or codes from 001.0 through V91.99
5. Selection of codes 001.0 through 999.9
General Coding Guidelines:
Section I. B.

6. Signs and symptoms
7. Conditions that are an integral part of the disease process
8. Conditions that are **not** an integral part of the disease process
9. Multiple coding for a single condition
10. Acute and Chronic conditions

General Coding Guidelines:
Section I. B.

11. Combination code
12. Late Effects
13. Impending or threatened conditions
14. Reporting same diagnosis more than once
15. Admissions/encounters for rehabilitation
16. Documentation of BMI (Body Mass Index) and pressure ulcer stages
17. Syndromes

Section IV: Diagnostic Coding and Reporting Guidelines for Outpatient Services

A. Selection of first-listed condition
   1. Outpatient surgery
   2. Observation stay
B. Codes from 001.0 through V91.99
C. Accurate reporting of ICD-9-CM diagnosis codes
D. Selection of codes 001.0 through 999.9
E. Codes that describe symptoms and signs
Section IV: Diagnostic Coding and Reporting Guidelines for Outpatient Services

F. Encounters for circumstances other than a disease or injury

G. Level of detail in coding

H. ICD-9-CM code for the diagnosis, condition, problem, or other reason for encounter/visit

I. Uncertain diagnosis

J. Chronic diseases

K. Code all documented conditions that co-exist

L. Patients receiving diagnostic services only

M. Patients receiving therapeutic services only

N. Patients receiving preoperative evaluations only

O. Ambulatory Surgery

P. Routine outpatient prenatal visits
Introduction to CPT®

• The CPT® code set includes three categories of medical nomenclature with descriptors.
  – Category I
  – Category II
  – Category III

• Instructions for use of the CPT® code book
  – Unlisted procedure
  – CPT® use by any qualified health care professional
  – Parenthetical notes
  – Accuracy and quality of coding
    • Related guidelines
    • Parenthetical instructions
    • Other coding resources
CPT® Guidelines

- Referenced in the introduction of each section and subsection of the CPT® manual
- Applicable to the section being referenced
- Define the information necessary for choosing the correct code

CPT® Conventions and Iconography

Used throughout the CPT® manual and include:
- Indentations
- Code symbols - iconology
- Parenthetical instructions

; The semicolon and the conventional use of indents

The use of the semicolon divides the description of a code into two parts:
- The “stand-alone” code or the “common portion of the procedure” code descriptor
- The indented descriptor is dependent on the preceding “stand-alone” code
CPT® Conventions and Iconography

+ The “add-on” code symbol - Add-on codes are never reported alone

Example:
+11201 each additional ten lesions, or part thereof
(Use 11201 in conjunction with 11200)

CPT® Conventions and Iconography

● The red bullet - new procedure code

Example:
● 31660 Bronchoscopy, rigid or flexible, including fluoroscopic guidance, when performed, with bronchial thermoplasty, 1 lobe

▲ The (blue) triangle - code revision

Example:
▲ 32551 Tube thoracostomy, includes connection to drainage system, (eg, water seal), when performed, open (separate procedure)

CPT® Conventions and Iconography

► Opposing triangles - indicate new and revised text other than the procedure descriptors

29581 Application of multi-layer compression system; leg (below knee), including ankle and foot
(Do not report 29581 in conjunction with 29540, 29580, 29582, 36475, 36478)
CPT® Conventions and Iconography

- The circle with a line through it - exempt from the use of modifier 51
  Example: ⊗ 20974 Electrical stimulation to aid bone healing; noninvasive (nonoperative)

- The bulls eye - includes moderate sedation
  Example: ◊ 43200 Esophagoscopy, rigid or flexible; diagnostic, with or without collection of specimen(s) by brushing or washing (separate procedure)

CPT® Conventions and Iconography

The lightning bolt symbol - codes for vaccines that are pending FDA approval.
Example: 90661 Influenza virus vaccine, derived from cell cultures, subunit, preservative and antibiotic free, for intramuscular use
AMA CPT® “Category I Vaccine Codes” website: www.ama-assn.org

# The number symbol - Resequenced and are out of numerical order
Example: # 46947 Code is out of numerical sequence. See 46700-46947.
# 46947 Hemorrhoidopexy (for prolapsing internal hemorrhoids) by stapling

Category I CPT® Codes

The CPT® coding manual divides Category I CPT® codes into six main section titles:
- Evaluation and Management
- Anesthesiology
- Surgery
- Radiology
- Pathology and Laboratory
- Medicine
Category I CPT® Codes

- Section titles have subsections divided by anatomic location, procedure, condition, or descriptor subheadings.
- The subheadings, structured by CPT® conventions, may list alternate coding suggestions in parenthetical instructions.
- Example:
  - Section: Surgery (10021-69990)
  - Subsection: Integumentary System
  - Subheading: Skin, Subcutaneous and Accessory Structures
  - Category: Debridement
    - (For dermabrasions, see 15780–15783)
    - (For nail debridement, see 11720-11721)
    - (For burn(s), see 16000-16005)
    - (For pressure ulcers, see 15920-15999)

The CPT® Coding Manual

- CPT® Sections
- Section Guidelines
- Section Table of Contents
- Notes
- Category II codes (0001F – 7025F)
- Category III codes (0019T – 0318T)
- Appendices A-O
- Alphabetic Index

CPT® Code Basics

- Review medical documentation thoroughly and gather additional reports
- Reference the alphabetical index for a CPT® numerical code and/or code range:
  - Condition
  - Procedure or service
  - Anatomic site
  - Synonyms, eponyms and abbreviations
- Review the numerical code and/or code range for specific descriptions
- Follow CPT® Guidelines, Conventions and Iconology
National Correct Coding Initiative (CCI)

- Implemented by CMS
- Promotes correct coding methodologies
- Controls the improper assignment of codes that results in inappropriate reimbursement

Medicare publishes CCI:
http://www.cms.hhs.gov/NationalCorrectCodInitEd/

Sequencing

- Based on RBRVS
  - Physician Work
  - Practice Expense
  - Professional Liability/Malpractice Insurance

- Highest RBRVS listed first
www.cms.hhs.gov/PhysicianFee-Sched/

CPT® Assistant

- Articles answering everyday coding questions
- CCI bundling information
- E/M billing guidance
- Current code use and interpretation
- Case studies demonstrating practical application of codes
- Anatomical illustration charts and graphs for quick reference
- Information for appealing insurance denials
- Information to validate code usage when audited
Category II CPT® Codes

- Alphanumeric format, with the letter “F” in the last position, eg, 0001F
- Optional “performance measurement” tracking codes
- Physician Quality Reporting Initiative (PQRI)

Category III CPT® codes

- Temporary codes
- Alphanumeric structure, with a “T” in the last position, eg, 0019T
- Can be reported alone, without an additional Category I code

CPT® Appendices

Appendix A - Modifiers categorized:
- Modifiers applicable to CPT® codes
- Anesthesia Physical Status Modifiers
- CPT® Level I Modifiers approved for Ambulatory Surgery Center (ASC) Hospital Outpatient Use
- Level II (HCPCS/National) Modifiers
CPT® Appendices

- Appendix B - changes and additions to the CPT® codes from the previous year
- Appendix C - clinical E/M examples for different specialties
- Appendix D – Add-on Codes

CPT® Appendices

- Appendix E – Exempt from the use of modifier 51 (multiple procedures)
- Appendix F – Exempt from the use of Modifier 63 (procedures performed on infants less than 4kg)
- Appendix G – Include Moderate (Conscious) Sedation

CPT® Appendices

- Appendix H – Alphabetic Index of Performance Measures by Clinical Condition or Topic
  - Available only on the AMA website
    - www.ama-assn.org
- Appendix I – Genetic Testing Code Modifiers
  - Removed from the 2013 code set
- Appendix J - Electrodiagnostic Medicine Listing of Sensory, Motor, and Mixed Nerves
CPT® Appendices

- Appendix K - Product Pending FDA Approval
- Appendix L - Vascular Families
  - Based on the assumption that a vascular catheterization has a starting point of the aorta
- Appendix M - Crosswalk to Deleted CPT® Codes
- Appendix N - Summary of Resequence CPT® Codes
- Appendix O - Multianalyte Assays

CPT® Global Surgical Package

- Includes a standard package of preoperative, intraoperative, and postoperative services
- Payer policies may vary
- May be furnished in any service location
  - For example, a hospital, an ambulatory surgical center (ASC), or physician office

Included in the surgery package and not separately billable:

- Local infiltration, metacarpal/metatarsal/digital block or topical anesthesia
- Subsequent to the decision for surgery, one related E/M encounter on the date immediately prior to or on the date of procedure (including history and physical)
- Immediate postoperative care, including dictating operative notes, talking with the family and other physicians
- Evaluating the patient in the postanesthesia recovery area
- Writing orders
- Typical postoperative follow-up care
CMS Global Surgical Package

• Major Surgery: Has a preoperative period of 1 day with 90 days for the postoperative period.

• Minor Surgery: The preoperative period is the day of the procedure with a postoperative period of either 0 or 10 days depending on the procedure.

HCPCS Level II

• Types of Level II Codes
  – Permanent National Codes maintained by the CMS HCPCS Workgroup
    • Responsible for additions, deletions, revisions
    • Updated annually
  – Temporary National Codes maintained by the CMS HCPCS Workgroup
    • Responsible for additions, deletions, revisions
    • Updated quarterly

HCPCS Level II

Types of Temporary Codes

• G codes
  – Professional health care procedures/services with no CPT® codes
  – Example:
    • G0412 – G0415 – unilateral or bilateral
    • 27215 – 27218 – unilateral only, use modifier 50 for bilateral

• H codes
  – Used by State Medicaid Agencies for mental health services such as alcohol and drug treatment services
HCPCS Level II

Appendices:
- Level II modifiers
  - May be used with some CPT® codes, i.e., LT/RT
- Table of Drugs
  - Names of Drugs, dosage, delivery method, J code
- Medicare References
- Jurisdiction List
- Deleted Code Crosswalk

(each publisher may have different appendices)

Modifiers

- 22 – Increased Procedural Service
  - Service provided is greater than that usually required for the listed procedure
- 24 - Unrelated E/M by the same physician during a postoperative period

Global Package Modifiers

- 25 - Significant, separately identifiable evaluation and management service by the same physician on the same day of the procedure or other service
- 57 - Decision for surgery
Global Package Modifiers

- 58 - Staged or related procedure or service by the same physician during the postoperative period
- 78 - Unplanned return to the operating/procedure room by the same physician following initial procedure for a related procedure during the postoperative period
- 79 - Unrelated procedure or service by the same physician during the postoperative period

Surgical Modifiers

- 50 - Bilateral Procedure
- 51 - Multiple Procedures
- 52 - Reduced Services
- 53 - Discontinued Procedure

Modifier 59 - Distinct Procedural Service

- Procedures not normally reported together
- Different Session or Patient Encounter
- Different Procedure or Surgery
- Different Site or Organ System
- Separate Incision/Excision
- Separate Lesion
Modifiers

• Modifier 63 - Procedures Performed on Infants Less than 4kg Increased work intensity

• Modifier 76 - Repeat Procedure or Service by Same Physician

• Modifier 77 - Repeat Procedure or Service by Another Physician

Multiple Surgeon Modifiers

• 62 – Two Surgeons
  – Work together as primary surgeons
  – Perform distinct parts of a procedure
  – Dictate op report of their distinct part
  – Each will submit the same code and append modifier 62

• 66 – Surgical Team
  – Highly complex procedures
  – Require differently specialties
  – Modifier 66 appended to procedures coded by the surgical team

Assistant Surgeon Modifiers

• 80 – Assistant Surgeon
  – Assistant surgeon present for entire or substantial portion of the operation
  – Reports the same surgical procedure with modifier 80 appended

• 81 – Minimum Assistant Surgeon
  – Circumstances present that require the services of an assit surgeon for a short time. Minimal assistance.
  – Reports the same surgical procedure with modifier 81 appended

• 82 – Assistant Surgeon (when qualified resident surgeon not available)
  – Used in a teaching hospital that employs residents
  – No residents available and another surgeon is used
Ancillary Modifiers

- **Global** – a procedure containing both a technical and a professional component
- **Modifier 26** – Professional Component
- **Modifier TC** – Technical Component

Laboratory Modifiers

- **90** – Reference (Outside) Laboratory
  - Used to bill for lab services purchased from an outside lab
- **91** – Repeat Clinical Diagnostic Lab Test
  - Not used to confirm results
  - Not used to repeat a test due to equipment malfunction
- **92** – Alternative Lab Platform Testing
  - Single use
  - HIV testing

Anesthesia Modifiers

- **23** - Unusual Anesthesia
- **47** – Anesthesia by Surgeon
- Physical Status Modifiers
Anatomy of the Skin

- **Epidermis**
  - Top layer
  - Made up of 4-5 layers; function is protection

- **Dermis**
  - Mid layer
  - Blood vessels, connective tissue, nerves, etc.

- **Subcutaneous Tissue**
  - Connective tissue and adipose tissue

ICD-9-CM: Integumentary

- Chapter 2 – Neoplasms
- Chapter 12 – Diseases of the Skin and Subcutaneous Tissue
- Chapter 17 – Injury and Poisoning
ICD-9-CM: Integumentary

Chapter 12: Diseases of the Skin and Subcutaneous Tissue
- Skin infections (bacterial and fungal)
- Inflammatory conditions of the skin
- Other disorders of the skin
  - Corns and calluses
  - Keloid scars
  - Keratosis
  - etc.

Inflammatory Conditions of the Skin
- Erythema multiforme:
  - Code for erythema multiforme
  - Code associated manifestation
  - Code percent of skin exfoliation (695.50-695.59)
  - An additional E code if drug induced

Pressure Ulcers
- Decubitus ulcers/bed sores
  - Coding
    - Identify the location of the ulcer
    - Identify the stage of the ulcer
Injury and Poisoning

- Open Wounds (870-897)
- Superficial Injury (910-919)
- Contusion with Intact Skin Surface (920-924)
- Burns (940-949)

Burns

- Location
- Severity (degree) of burn
- Total Body Surface Area (TBSA)

Disorders of the Breast

- Category 610 - Mammary dysplasia
- Category 611 - Disorders of the breast
- Category 612 – Deformity and disproportion of reconstructed breast
Skin, Subcutaneous, and Accessory Structures

- Incision and Drainage
  - Simple
  - Complicated*

  * Complicated = placement of a drain, presence of infection, hemorrhaging that requires ligation, extensive time

Debridement

- Debridement
  - Method for removing dead tissue, dirt, or debris from infected skin, burn or wound
  - Based on percent of body surface area
- Debridement of necrotizing soft tissue
  - Based on area of body being debrided
- Medicine codes
  - 97597-97602

Biopsy

- 11100 single lesion
- 11101 each separate/additional lesion
- Three lesions
  - 11100 and 11101 x 2
- Obtaining of tissue during another procedure is not considered a separate biopsy
Skin, Subcutaneous, and Accessory Structures

• Removal of Skin Tags
  – 11200 up to and including 15 lesions
  – 11201 add-on code for each additional 10 lesions

• Shaving of Epidermal Lesions 11300-11313
  – Include local anesthesia & chemical/electocauterization of wound
  – Select codes on size and anatomic location

Skin, Subcutaneous, and Accessory Structures

• Excision of Lesions
  – Measurement
    • Lesion diameter plus narrowest margins

• Code Selection
  – Benign or Malignant
  – Size in centimeters
  – Anatomical location

Nails

• Fingernails and/or toenails

• Trimming or Debridement
Integumentary System

• Pilonidal Cyst
  – Coded according to complexity of excision

• Introduction
  – Intralesional Injections
  – Tattooing
  – Tissue Expansion
  – Contraceptive Capsule insertion/removal
  – Hormone implantation
  – Drug Delivery Implants

Repair

• Three factors
  – Length of wound in centimeters
  – Complexity of repair
  – Site of wound

• Wound closure includes sutures, staples tissue adhesive

• Wound repair using only adhesive strips report with E/M

Repair

• Adjacent Tissue Transfer or Rearrangement
  – Z-plasty
  – W-plasty
  – V-Y plasty
  – Rotation Flaps
  – Advancement Flaps
Repair

- Skin Replacement Surgery & Skin Substitutes
  - 15002-15005 based on size of repair and site
  - 15040-15261 reported for autografts and tissue cultured autografts
  - 15271-15278 reported for skin substitute grafts
  - 15050 is pinch graft measured in centimeters
  - All other skin graft codes are determined by the size of the defect in square centimeters
  - Square centimeters calculation: length in cm x width in cm

- Other Procedures
  - Dermabrasion
  - Chemical Peels
  - Cervicoplasty
  - Blepharoplasty
  - Rhytidectomy
  - Abdominoplasty
  - Lipo-suction

Destruction

- Ablation by any method other than excision
  - Electrosurgery
  - Cryosurgery
  - Laser treatment
  - Chemical treatment
- Benign/premalignant based on number of lesions
- Malignant lesion according to location and size in centimeters
Destruction

- Mohs Micrographic Surgery
  - Removal of complex or ill-defined skin cancer
  - Physician acts as surgeon and pathologist
  - Removes tumor tissues and performs histopathologic exam
  - Repair of site may be reported separately

Breast

- Incision
- Excision
- Introduction
  - Preop needle localization wire
- Repair
- Reconstruction
- Biopsy
  - Percutaneous
  - Incisional

Breast

- Mastectomy
  - Muscles and lymph nodes involved will determine code selection
- Repair Reconstruction
  - Reconstruction after mastectomy
- Mastopexy (breast lift)
- Reduction mammoplasty (breast reduction)
Musculoskeletal System

Anatomy

- Skeleton
  - Axial
  - Appendicular

- Muscles
  - Assist with heat production
  - Posture

- Ligaments
  - Attach bones to other bones

- Tendons
  - Attach muscles to bones

- Cartilage
  - Acts as a cushion between bones in a joint

ICD-9-CM Coding

Fifth Digit Specification

0—Site unspecified
1—Shoulder region (Acromioclavicular joint, Clavicle, Glenohumeral joint(s), Scapula, Sternoclavicular joint(s))
2—Upper arm (Elbow joint, Humerus)
3—Forearm (Radius, Ulna, Wrist joint)
4—Hand (Carpals, Metacarpals, Phalanges (fingers))
5—Pelvic region and thigh (Buttock, Femur, Hip joint)
6—Lower leg (Fibula, Knee joint, Patella, Tibia)
7—Ankle and foot (Ankle joint, Digits (toes), Metatarsals, Phalanges, Foot, Tarsals, Other joints in foot)
8—Other specified sites (Head, Neck, Ribs, Skull, Trunk, Vertebral column)
9—Multiple sites

AAPC® Certification Review
Diseases of the Musculoskeletal System and Connective Tissue

- Arthropathy – pathology or abnormality of a joint
- Dorsopathies – disorders affecting the spinal column
- Rheumatism – non-specific term for any painful disorder of the joints, muscles, or connective tissue
- Enthesopathies – disorders of ligaments
- Bursitis – inflammation of the bursa

Injury and Poisoning

- Sprains and Strains
- Fractures
  - Comminuted
  - Impacted
  - Simple
  - Greensick
  - Pathologic
  - Compression
  - Torus or Incomplete

CPT®: Musculoskeletal System

Formatted by anatomic site:

- General
- Head, Neck (soft tissues) and Thorax
- Back and Flank
- Spine (vertebral column)
- Abdomen
- Shoulder, Humerus and Elbow
- Forearm and Wrist
- Hand and Fingers
- Pelvis and Hip Joint
- Femur and Ankle Joint
- Foot and Toes
- Application of Casts and Strapping
- Endoscopy/Arthroscopy
Musculoskeletal System

- "General" subheading
  - Many different anatomic sites

- Other subheadings
  - Divided by anatomic site, procedure type, condition and description
    - Incision, excision, introduction or Removal, Repair, Revision and/or Reconstruction, Fracture and/or dislocation, Arthrodesis, Amputation

Guidelines
Types of Fracture Treatment

- Closed - the fracture site not surgically exposed.
- Open – used when fractured bone is surgically exposed
- Percutaneous skeletal fixation

General

- Not specific to anatomic site
- Incision of soft tissue abscess
  - Associated with deep tissue
- Wound Exploration
  - Traumatic wounds
    - Include surgical exploration/enlargement, debridement, removal of foreign bodies, ligation/coagulation minor blood vessels
General

• Excision & Biopsy
  – Muscle or Bone
  – Depth of wound or tissue excised

• Introduction or Removal
  – Injections
  – Foreign body removal

Anatomical Subheadings

• Based on anatomic site

• Divided based on procedure
  – Incision
  – Excision
  – Fracture

• Read notes carefully

Spine

• Anatomy
  – Cervical C1-C7
    • C1 Atlas
    • C2 Axis
  – Thoracic T1-T12
  – Lumbar L1-L5

• Spinal Instrumentation
  – Segmental
  – Non-segmental
Endoscopy/Arthroscopy

- Divided by body area
  - Elbow
  - Shoulder
  - Knee
- Surgical endoscopy/arthroscopy includes a diagnostic endoscopy/arthroscopy
- Multiple surgical procedures performed through scope may be reported
- "Separate procedure" – included in more extensive procedure

HCPCS Level II

- Orthotic and Prosthetic
- Basic Orthopedic Supplies
  - Crutches
  - Canes
  - Walkers
  - Traction Devices
  - Wheelchairs
  - Other orthopedic supplies

Respiratory, Hemic, Lymphatic, Mediastinum and Diaphragm
Respiratory System

- Nose
- Larynx
- Pharynx
- Trachea
- Bronchi
- Bronchioles
- Lungs
- Alveoli
  - Located at the ends of the bronchioles
  - Function is gas exchange (CO\textsuperscript{2} and O\textsuperscript{2})
- Pleura

Mediastinum and Diaphragm

- Mediastinum-thoracic cavity between the lungs that contains the heart, aorta, esophagus, trachea, thymus gland
- Diaphragm-muscle that divides the thoracic cavity from the abdominal cavity

Hemic and Lymphatic Systems

- Network of channels
- Structures dedicated to circulation and production of lymphocytes
- Three interrelated functions
  - Removal for interstitial fluid from tissues
  - Absorbs and transports fatty acids to circulatory system
  - Transport antigen presenting cells to lymph nodes
Hemic and Lymphatic Systems

• Spleen
  – Located left side of stomach
  – Reservoir for blood cells
  – Produces lymphocytes involved in fighting infection

ICD-9-CM: Respiratory

• Acute Respiratory Infections (460-466)
• Other Disease of the Upper Respiratory System (470-478)
• Pneumonia and Influenza (480-488)
• COPD and Allied Conditions (490-496)

ICD-9-CM

• Mediastinum and Diaphragm
  – Diaphragm Herniation
  – Diaphragmatic Paralysis
  – Thymic hyperplasia
• Hemic and Lymphatic Systems
  – Lymphoma
  – Lymphadenitis
  – Hypersplenism
  – Splenic Rupture
  – Leukemia
Rules/Guidelines

- Respiratory procedures
  - Progress downward from the head to the thorax
- Parenthetical statements
  - Directions on how to use specific codes
  - Apply to codes above parenthetical note; not below
- Most codes are unilateral
- Use modifier 50 if bilateral procedure performed
  - Unless code descriptor states bilateral

Nose

- Rhinotomy
- Excision
  - Biopsy code
  - Removal of lesions, cysts, and/or polyps
  - Turbinates
- Rhinectomy

Nose

- Introduction
  - Therapeutic turbinate injection
  - Prosthesis for deviated nasal septum
    - Plug placed by physician
- Removal of foreign body
  - Office setting
  - Facility setting
    - General anesthesia
Nose

- Repair
  - Rhinoplasty
  - Septoplasty, Atresia, Fistulas, Dermatoplasty
- Destruction
  - Turbinate mucosa
- Other procedures
  - Control of epistaxis (nose bleed)
  - Fracturing of turbinates

Accessory Sinuses

- Four pairs of sinuses
- Procedures
  - Obliterative
  - Non-obliterative
- Endoscopies
  - Diagnostic/Surgical
  - All surgical endoscopies always include a diagnostic endoscopy

The Larynx

- Laryngotomy
- Laryngectomy
- Pharyngolarunrectomy
- Arytenoidectomy
- Incision
  - Emergency endotracheal intubation
  - Change of tracheotomy tube
The Larynx

- Endoscopy
  - Use of operating microscope or telescope
    - Parenthetical statement instructs not to code the operating microscope
  - Direct visualization
    - View anatomical structures via bronchoscope inserted into laryngoscope
  - Indirect visualization
    - Structures viewed in a laryngoscopic mirrored reflection

Trachea and Bronchi

- Endoscopy
  - Many bronchoscopy codes
    - Use common portion of main or parent code (up to the semicolon) as the first part of each indented code descriptor under the parent code
    - Bulls eye icon – code includes moderate sedation and is not reported separately when performed
  - Bronchoscopy codes
    - Bronchial lung biopsies
    - Foreign body removals
    - Stent or catheter placements
    - Flexible or rigid scopes
    - Many parenthetical statements

- Excision and Repair
  - Carinal reconstruction
    - Needed after removal of cancer at this site
  - Tracheal tumor excision
    - Thoracic and intrathoracic
  - Stenosis and anastomosis excision
  - Injury suturing
  - Tracheostomy scar revision
Lungs and Pleura

- Incision codes
  - Thoracostomy
  - Thoracotomy
  - Pneumonostomy
  - Pleural scarification
  - Decortication

- Excision
  - Biopsies
    - Read parenthetical statement directions
  - Pleurectomy

- Removal
  - Pneumocentesis
  - Thoracentesis
  - Total pneumonectomy
  - Lobectomy
  - Resections

- Introduction and Removal
  - Thoracostomy (chest tube)

- Endoscopy
  - Diagnostic vs. surgical
  - VATS
Lungs and Pleura

- Lung Transplantation
  - Three steps
    - Harvesting
    - Backbench
    - Insertion
  - Live donors
    - Rare
    - Only one lobe donated
  - Cadaver donors
    - Most commonly used

Lungs and Pleura

- Surgical collapse therapy/thoracoplasty
  - Resection
  - Thoracoplasty
- Other procedures
  - Lung lavage
  - Tumor ablation
  - Unlisted - 32999

Pulmonary

- Ventilator Management
- Other Procedures
  - Spirometry
  - Pulmonary capacity studies
  - Respiratory flow studies
  - Pulmonary stress testing
  - Inhalation treatment
  - Oxygen uptake
  - Pulse oximetry
Mediastinum & Diaphragm

- Mediastinum
  - Mediastinotomy – based on approach
  - Excision (cyst, tumor)
  - Endoscopy
- Diaphragm
  - Hernia repair
  - Resections

Hemic and Lymphatic Systems

- Spleen
  - Splenectomy
    - Code selection based on type
  - Splenorrhaphy
    - Reported when a ruptured spleen is repaired
- General
  - Bone Marrow or Stem Cell Services

Hemic and Lymphatic Systems

- Lymph Nodes & Lymphatic Channels
  - Drainage of lymph node abscess
  - Biopsy or Excision
    - Code selection based on method and location
  - Lymphadenectomy
    - Limited – removes only lymph nodes
    - Radical – removal of lymph nodes, glands and surrounding tissue
  - Injection Procedures
  - Lymphangiography
Heart

- 4 Chambers
  - Two atria
  - Two ventricles
- Three layers
  - Myocardium
  - Epicardium
  - Pericardium

- Valves
  - Atrioventricular valves
    - Tricuspid
    - Bicuspid
  - Semilunar valves
    - Pulmonary
    - Aortic

Oxygenation Process

RA > tricuspid valve > RV
RV > pulmonary valve > pulmonary artery
LUNGS (gas exchange)
LA > mitral valve > LV
LV > aortic valve > BODY via arteries
BODY > via veins > RA
Electrical Conduction in the Heart

Conduction begins in sinoatrial node of right atrium
• Nature’s pacemaker
• Firing causes contraction of muscle

Moves to atrioventricular node
• Then to Bundle of His along septum
• Then to Purkinje fibers along the surface of ventricles

Coronary Arteries & Blood Vessels

• Arteries
  – Carry oxygenated blood
  – Take blood away from heart to the body

• Veins
  – Carry deoxygenated blood
  – Bring blood back to the heart from the capillary beds

• Capillaries
  – Connect arteries and veins

Circulations

• Pulmonary Circulation
  – Pushes deoxygenated blood into the lungs
  – Carbon dioxide removed and oxygen added
  – Blood flows to the left atrium

• Systemic Circulation
  – Blood flows from left atrium into the left ventricle
  – Pumped to the body to deliver oxygen and remove carbon dioxide
ICD-9-CM Coding

Chapter 01 – Infectious and parasitic diseases
Chapter 02 – Neoplasms
Chapter 07 – Diseases of the Circulatory System
Chapter 14 – Congenital Anomalies
Chapter 16 – Signs, Symptoms and Ill-Defined Conditions

ICD-9-CM: Hypertension

• Hypertensive Disease
  – 401 Essential hypertension
  – 402 Hypertensive heart disease
  – 403 Hypertensive chronic kidney disease
  – 404 Hypertensive heart and chronic kidney disease

ICD-9-CM: Arteriosclerosis

• CAD of native coronary artery (414.01)
  – The patient is not a heart transplant
  – The patient has CAD with no history of CABG
  – The patient had a prior PTCA of native coronary artery and the patient is admitted with re-occlusion of this lesion
ICD-9-CM Coding

- Endocarditis
- Heart Failure
- Pericarditis
- Peripheral Arterial Disease (PAD)
- Valve Disorders
- Myocardial Infarction (MI)
  - Acute MI
  - Chronic MI and Old MI

CPT® Coding

- Surgical Section
- Radiology Section
  - Heart
  - Vascular
  - Diagnostic Ultrasound (various CPT®s)
  - Radiologic Guidance
  - Nuclear Medicine
- Medicine Section
  - Cardiovascular
  - Noninvasive Vascular Diagnostic Studies

Pacemakers/Defibrillators

- Pacemaker System
- Pacing cardioverter-defibrillator system
- Codes
  - Insertion or replacement
  - Implanted pacemakers
  - Biventricular (2 ventricles)
Cardiac Valve Procedures

• Aortic Valve
• Mitral Valve
• Tricuspid Valve
• Pulmonary Valve

CABG & Transluminal Angioplasty

• Coronary Artery Bypass Graft
  – Venous
  – Arterial-Venous
  – Reoperation
  – Arterial
  – Arterial Graft
• Transluminal Angioplasty

Bypass Grafts

• Non-coronary vessels
  – Vein
  – In-situ vein
    • Vein is left in native location
  – Other than vein
• Code by type/location
Central Venous Access Devices (CVAD)

- Placed for frequent access to bloodstream
- Tip of catheter must terminate in the:
  - Subclavian
  - Brachiocephalic
  - Iliac
  - Inferior or superior vena cava
- Code by:
  - Procedure (insertion, repair, replacement, removal, etc.)
  - Tunneled or not
  - With pump or port
  - Patient age
- See CVAP table in CPT®

Interventional Procedures

- Vascular Injection Procedures
  - Selective catheterizations should be coded to the highest level accessed within a vascular family
  - The highest level accessed includes all of the lesser order selective catheterizations used in the approach
  - Additional second and/or third order arterial catheterization within a vascular family of arteries or veins supplied by a single first order should be coded

CPT®: Cardiovascular

- Hemodialysis (36800-36822)
- Portal Decompression (37140-37183)
  - Treat hypertension/occlusion of portal vein
  - TIPS (37182, 37183) diverts blood from the portal vein to the hepatic vein
- Transcatheter Procedures
  - Removal of clot
    - Arterial (37184-37186)
    - Venous (37187-37188)
    - Other (37191-37216)
    - Foreign body retrieval, stent placement, etc.
Endovascular Revascularization

- Treat occlusive disease in lower extremities
- Three territories
  - Iliac
  - Femoral/Popliteal
  - Tibial/Peroneal
- Codes arranged in a hierarchy for each territory
  - stent placement with atherectomy (highest)
  - stent placement
  - atherectomy
  - angioplasty (lowest)

Bundled into Endovascular Revascularization

- conscious sedation
- vascular access
- catheter placement
- traversing the lesion
- imaging related to the intervention (previously billed as the supervision and interpretation code for the specific intervention)
- use of an embolic protection device (EPD)
- imaging for closure device placement
- closure of the access site

Interventional Radiology

- Consider
  - The number of catheter access sites
  - The number of catheter end points
  - The number of vessels visualized

- Vascular Family Order
  - Review Appendix L
Radiology Vascular Procedures

- Diagnostic angiography
  - Sometimes separately reportable
  - Diagnostic angiography performed at a separate setting from an interventional procedure is separately reportable
  - Diagnostic angiography performed at the time of an interventional procedure is NOT separately reportable if it is specifically included in the interventional code descriptor

Radiology

- Heart
  - Cardiac MRI & CT

- Cardiovascular System
  - Cardiac SPECT
  - Blood pool imaging
  - PET

Medicine Section

- Therapeutic services and procedures
- Cardiography
- Cardiovascular monitoring services
- Implantable wearable cardiac device evaluations
- Echocardiography
- Cardiac Catheterizations
- Intracardiac Electrophysiological Procedures/Studies
- Peripheral Arterial Disease Rehabilitation
- Noninvasive physiologic studies and procedures
- Other procedures
Digestive System

- Lips/Mouth
  - Teeth
  - Gums
  - Tongue
- Pharynx
  - Conduit for respiration and digestion
- Esophagus
  - Conduct food from the pharynx to the stomach
  - Peristaltic action moves the food

Digestive System

- Stomach
  - Cardia
  - Fundus
  - Pylorus (antrum)
  - Body
- Small Intestine (small bowel)
  - Duodenum
  - Jejunum
  - Ileum
- Large Intestine (large bowel)
  - Cecum (appendix attached)
  - Colon
    - Ascending colon
    - Transverse colon
    - Descending colon
    - Sigmoid colon
  - Rectum
  - Anus
Digestive System

- Pancreas
  - Endocrine and exocrine organ
  - Secretes insulin into the bloodstream
- Liver (Hepatic)
  - Largest organ and largest gland
- Gallbladder/Biliary System

ICD-9-CM: Digestive

Chapter 1 – Infectious and Parasitic Diseases
Chapter 2 – Neoplasms
Chapter 9 – Disease of the Digestive System
Chapter 14 – Congenital Anomalies
Chapter 16 – Signs, Symptoms, and Ill-Defined Conditions

Diseases of the Digestive System

- Esophageal and Swallowing Disorders
  - Barrett's Esophagus
  - Esophagitis
  - Esophageal varices
  - Mallory-Weiss Tear
  - Hiatal Hernia
  - Swallowing Disorders/Dysphagia
- Gastritis and Peptic Ulcer Disease
- Gastrointestinal Bleeding
- Gastroenteritis
Diseases of the Digestive System

- Inflammatory Bowel Disease (IBD)
- Irritable Bowel Syndrome (IBS)
- Foreign Bodies
- Diverticular Disease
  - Diverticulosis
  - Diverticulitis

Diseases of the Digestive System

- Anorectal Disorders
  - Rectal prolapse
  - Abscess
  - Hemorrhoids
  - Anal fissure
  - Anal fistula
- Pancreatitis
- Benign and Malignant Neoplasms of the Gastrointestinal Tract
- Congenital Disorders

CPT®: Digestive

- Organized by anatomic site and procedure

- Endoscopy
  - Visualization of a hollow viscus or canal by means of an endoscope or scope
  - Laparoscope is an endoscope
CPT®: Digestive

- Lips
  - Vermilonection
  - Cheiloplasty
- Mouth
  - Vestibuloplasty
  - Glossectomy
  - Palatoplasty

CPT®: Digestive

- Pharynx, Adenoids and Tonsils
  - Tonsillectomy
  - Adenoidectomy
  - Biopsy
  - Pharyngoplasty
  - Pharyngostomy
- Esophagus

CPT®: Digestive

- Endoscopy
  - Select and report an appropriate code for each anatomic site examined
  - Esophagoscopy
  - Upper GI Endoscopy (EGD)
  - Endoscopic retrograde cholangiopancreatography (ERCP)
CPT®: Digestive

• Stomach
  – Gastrectomy
  – Bariatric and Gastric Bypass
  – Endoscopic procedures

CPT®: Digestive

• Intestines (except rectum)
  – Incision
    • Enterolysis
    • Exploratory procedures
  – Endoscopic
    • Small intestines
    • Beyond the second portion of the duodenum and stomal endoscopy
    • Colonoscopies
    – Enterostomy

CPT®: Digestive

• Rectum
  – Incision – drainage of abscesses
  – Excision
    • Proctectomy – partial or complete
  – Endoscopy
    • Proctosigmoidoscopy
    • Sigmoidoscopy
    • Colonoscopy

• Anus
  – Hemorrhoids
CPT®: Digestive

- Liver
- Biliary Tract
- Pancreas

CPT®: Digestive

- Abdomen, Peritoneum, and Omentum
  - Exploratory laparotomy
  - Drainage of abscess – open or percutaneous
  - Laparoscopy
  - Hernia codes
    - Type of hernia
    - Strangulated or incarcerated
    - Initial or subsequent repair

HCPCS

- Colorectal cancer screening
  - G0104-G0106
  - G0120-G0122
Anatomy: Urinary System

- Two kidneys (filters)
- Renal pelvis/one per kidney (funnels urine into ureters)
- Two ureters (to bladder)
- One bladder (storage)
- One urethra (exit)

Nephro = kidney
Renal = related to kidney
Pyelo = renal pelvis

Anatomy: Male Reproductive System

- Testicles (sperm production, contained in scrotum)
- Duct system (transport sperm)
  - Epididymis
  - Vas deferens
- Accessory glands (contribute to ejaculate)
  - Seminal vesicles
  - Prostate gland
- Penis
  - Shaft
  - Glans
  - Prepuce
ICD-9-CM: Urinary

Look primarily to 580-629
- Listed anatomically
  - Kidney
  - Ureters
  - Bladder
  - Urethra

ICD-9-CM: Urinary

- Inflammation
  - Nephritis (583)
  - Glomerulonephritis (580-582)
- Renal failure (584-586)
- CKD (585)
  - ESRD
  - With hypertension (403-405)

ICD-9-CM: Urinary

- Renovascular disease (588)
  - Report underlying condition first
    - Central diabetes insipidus (253.5)
    - Nephrogenic diabetes insipidus (588.1)
- Small Kidney (589)
- Pyelonephritis (590)
- Hydronephrosis (591)
- Calculi (592)
ICD-9-CM: Urinary

• VUR (593.7x)
  – Backflow or urine into ureter

• Cystitis (595)
  – Bladder inflammation

• Voiding disorders (596)
  – Urinary incontinence (788.3x)

• UTI (599)
  – Report organism, when known

ICD-9-CM: Male Genital System

Look primarily to 600-608

• Listed anatomically
  – Prostate
  – Testes
  – Penis

Also...

• Congenital Anomalies
• Neoplasms
• Signs/Symptoms

ICD-9-CM: Male Genital System

• BPH
• Hyperplasia
• Prostatitis
• PSA
• Dysplasia
  – PIN III
  – PIN I or II
ICD-9-CM: Male Genital System

• Spermatic cord, Testis, Tunica Vaginalis, Epididymis
  – Hydrocele
  – Orchitis
• Penis
  – Phimosis
  – Balanitis
  – Routine circumcision
  – Male infertility
  – Peyronie’s disease

ICD-9-CM: Male Genital System

• Congenital Anomalies
  – Cryptorchidism
  – Hyposadias
  – Epispadias
• Neoplasms (by location)
• Injury
• Signs and Symptoms

CPT®: Urinary

• Arranged by location/procedure type
  – Incision, excision, repair, etc.
• Bilateral vs. Unilateral
• Operating Microscope (69990) may be separate
• Surgical endoscopy always includes diagnostic endoscope
CPT®: Kidney

- Incision ("otomy")
  - Nephrotomy = incision of kidney
  - Pyelotomy = incision of renal pelvis
  - Nephrolithotomy
  - Percutaneous removal of calculi
    - Nephrostomy tract
- Excision ("ectomy")
  - e.g., nephrectomy
  - Radical
  - Ablation

CPT®: Kidney

- Repair
  - Ureteral repair
  - Creation of ureteral conduit
- Introduction (aspiration, injection, instillation)
  - Ureteral stents
  - Catheter changes
  - Bladder irrigation and/or instillation

CPT®: Urinary

- Laparoscopy
  - Code by procedure
- Endoscopy
  - Performed through natural or created opening
- Other Procedures of Kidney
  - Renal Transplantation
  - Lithotripsy
  - Percutaneous ablation of renal tumors
  - Cryotherapy for renal tumors
- Urodynamics
CPT®: Male Genital System

Penis
- Incision
- Destruction
- Excision
  - Excision of plaque
  - Penectomy
  - Circumcision

- Introduction
- Repair
  - Hypospadias/epispadias
  - Prosthesis
- Manipulation

Female Genital System

Anatomy

External genitalia
- Mons pubis
- Labia (majora and minora)
- Hymen
- Bartholin's glands
- Clitoris
- Urethra

Internal Genitalia
- Vagina
- Uterus
- Cervix
- Fallopian tubes ("tubes" or oviducts)
- Ovaries
ICD-9-CM: Female Genital System

Chapter 10: Disease of the Genitourinary System
Chapter 11: Complications of Pregnancy, Childbirth, and the Puerperium
Chapter 2: Neoplasms
Chapter 18: V Codes

ICD-9-CM: Female Genital System

• Female Genitourinary System
• Complications of Pregnancy, Childbirth, and the Puerperium
  – Have sequencing priority
  – Report any condition that affects pregnancy (labor, delivery, post-partum)
  – If pregnancy is incidental to condition treated, report V22.2 as secondary code
    • Must document that condition treated does not affect pregnancy
    – Only for mother, not newborn

ICD-9-CM: Female Genital System

• Routine outpatient prenatal visits w/o complication
  – First pregnancy
  – Subsequent pregnancy
  – First-listed Dx
    – Not to be used with other Chapter 11 Codes

High-risk Pregnancy
• Code from category V23
• First-listed dx.
• May be reported with other Ch. 11 codes
CPT®: Female Genital System

Surgery

• Arranged by anatomy “outside to inside”
  – Terms used to describe external female genitalia
    • Perineum
    • Vulva
    • Pudenda
    • Introitus

• Consider terminology to determine procedure
  – -ectomy = removal
  – etc.

CPT®: Female Genital System

• Vulva

• Vagina
  – 57022 - Only CPT® code related to obstetrical complications NOT in labor/delivery section

• Cervix Uteri
  – Os = opening of cervix

CPT®: Female Genital System

• Uterus
  – Endometrial sampling
  – D&C
  – Hysterectomy
    • Total
      – Removal of fundus + cervix (e.g., 58150)
      – TAH = removed through abdomen
      – TVH = removed through vagina
    • Partial

• Oviduct/Ovary
Maternity Care/Delivery

Antepartum care
• Initial visit during pregnancy
• Ongoing visits during pregnancy
  – Average of 13 visits (global OB package)
• OB package includes…
  – Antenatal care
  – Delivery
  – Episiotomy and repair
  – Postpartum care

Postpartum care includes…
• Hospital visits
• 6-week checkup in the office
• Services related to cesarean delivery
  – e.g., two week incision check

Unrelated encounters are reported separately

• “Partial” maternity/delivery care
  – Patient moves
  – Change of coverage, etc.
• Cesarean Delivery
• Twin delivery
• Ultrasound
  – NOT included in OB global package
  – Some payers may include one U.S. in global package (standard of care)
  – More than one U.S. may be performed
Abortion

• Spontaneous
  – Miscarriage
    • Complete
    • Missed
      – D&C may be required

• Induced
  – Therapeutic (medical termination of pregnancy)
    • Failed induced abortion
      – Hysterotomy

Endocrine and Nervous System

Anatomy: Endocrine

• Comprised of ductless glands that secrete hormones into the circulatory system
  – Thyroid
  – Parathyroid
  – Thymus
  – Adrenal glands
    • Medulla
    • Cortex
Anatomy: Endocrine

- Pancreas
  - Endocrine and digestive functions
- Carotid body
  - Contains glandular tissue
- Pituitary gland
  - Anterior and posterior lobes
- Pineal gland
- Structures classified elsewhere
  - e.g., kidneys, testes, ovaries

Anatomy: Nervous System

- Comprised of two components
  - CNS
    - Brain
    - Spinal Cord
  - PNS
    - Nerves running throughout the body

Nerve Plexi

- Cervical
  - Head, neck, shoulders
- Brachial
  - Chest, shoulders, arms, hands
- Lumbar
  - Back, abdomen, groin, thighs, knees, calves
- Sacral
  - Pelvis, buttocks, genitals, thighs, calves, feet
- Solar (Coccygeal)
  - Internal organs
Anatomy: Nervous System

- Spinal cord functions:
  - Motor information to muscles
  - Sensory information to brain
  - Reflex coordination
- Segment (bone) vs. interspace (space between)
- Segments (Body, Lamina, Process [Spinous, Transverse], Foramen)
- Facet joints
  - One per side, where segments meet

Anatomy: Nervous System

The Brain
- Frontal lobe
  - Cerebrum
- Two temporal lobes
- Parietal lobes
  - Primary sensory cortex
- Occipital lobe
- Cerebellum
- Brainstem
- Ventricles

ICD-9-CM: Endocrine

Categories 240-279, by location
- Thyroid
- Parathyroid
- etc.

Neoplasms (Chapter 2)
- Report neoplasm first
- Additional dx. as a result of neoplasm are secondary
ICD-9-CM: Endocrine

- Addison’s disease
- Primary hyperparathyroidism
- Diabetes (250.xx)
  - 4th digit complications/manifestations
    - Report complications/manifestations as secondary
  - 5th digit type I/II and controlled/uncontrolled
- Secondary diabetes (249.xx)
  - Always has an underlying cause

ICD-9-CM: Nervous System

- Inflammation
  - Meningitis (lining of brain/spinal cord)
  - Encephalitis (brain)
  - Myelitis (spinal cord)
  - Encephalomylitis (brain and spinal cord)
- Sleep disorders
- Hereditary/degenerative disease of CNS
  - Report underlying disease when instructed

ICD-9-CM: Nervous System

- Pain (NEC)
  - Pain control is reason for visit
  - Do not report as primary if you know the underlying cause, and visit is to manage that dx.
  - Acute vs. Chronic
- Disorders of CNS
  - Migraine
    - Fifth digit for status migrainosus
    - Headache NOS
ICD-9-CM: Nervous System

- Disorders of PNS
  - Trigeminal nerve disorder
  - Neuritis
  - CTS
- Neoplasms
  - Search in Vol. 2
  - Use neoplasm table, by location and type

CPT®: Endocrine

- Thyroid
- Parathyroid, Thymus, Adrenals, Pancreas
- Unlisted
- Endocrinology

CPT®: Nervous System

- Skull, Meninges, and Brain
  - Twist drill
  - Burr holes
  - Cranietomy/craniotomy
- Skull base surgery
  - Approach
  - Definitive procedure
  - Repair/reconstruction
- Endovascular therapy
  - Balloons or stents to treat arterial disease
CPT®: Nervous System

- AV malformation
  - Simple vs. complex
- Intracranial aneurysm
  - Simple vs. complex
- Other techniques
- Anastomosis to bypass aneurysm
- Stereotaxis/Radiosurgery
  - Lesion treatment

CPT®: Nervous System

- Craniocerebral neurostimulators
  - Pulse generator
  - Electrodes
    - eg, for Parkinson’s, epilepsy
- Repair of skull
  - Skull fracture
  - Encephalocele

CPT®: Nervous System

- Neuroendoscopy
- CSF Shunt
  - Drain accumulation of CSF
  - May require revision

CPT®: Nervous System

- Spine and Spinal Cord
  - Injection, Drainage, Aspiration
    - Pay careful attention to notes and parentheticals
    - Spinal tap (diagnostic / therapeutic)
    - Neurolytic injections
  - “Pain pumps”
  - Intrathecal catheter
  - Laminectomy vs. Laminotomy
    - Complete vs. partial excision of lamina
    - Code by spinal region
    - Include decompression
CPT®: Nervous System

- Decompression
  - Must consider approach
  - Discectomy
  - Osteophytectomy (removal of bony outgrowth)
  - Corpectomy (vertebral body resection)
- Intra/extradural excision of intraspinal lesion
- Stereotaxis/radiosurgery
- Spinal Neurostimulators
  - Electrodes
  - Pulse generator

CPT®: Nervous System

- Extracranial nerves, PNS, Autonomic
  - 12 pair cranial nerves
  - 31 pair spinal nerves
  - Autonomic ganglia/plexi
- PNS
  - Somatic nerves
  - Autonomic nerves
    - Sympathetic and parasympathetic

CPT®: Nervous System

- Facet Joint injections
  - Nerve block
    - Unilateral
    - Focus on “joint” between vertebrae
  - Nerve “destruction”
  - Somatic or sympathetic nerve
  - Number of levels
  - If infused, duration
CPT®: Nervous System

- Injection of sympathetic nerves
- Peripheral Neurostimulators
  - surface or percutaneous
- Destruction by neurolytic agent
- Neuroplasty
  - Freeing of nerves from scar tissue
- Transection/avulsion (divide/tear away)

CPT®: Nervous System

- Excision
  - By nerve
- Neurorrhaphy
  - Suturing of nerve
  - Without or with graft
  - By nerve
- Operating microscope
  - Beware bundling issues

CPT®: Nervous System

Neurology/Neuromuscular

- Sleep studies
- EEG
- Muscle/ROM testing
- EMG
- Chemo guidance
- EP/Reflex testing
- Neurostimulator analysis/programming
Anatomy: Eye and Ocular Adnexa

- Eyeball
  - Sclera
  - Cornea
  - Pupil and Iris
  - Choroid – vascular layer
  - Retina – pigmented nerve layer
- Optic nerve and Optic disc

Anatomy: Ear and Auditory System

- Middle ear
  - Tympanic membrane
  - Ossicles – malleus, incus, stapes
  - Eustachian tube
- Inner ear
  - Labyrinth
  - Membranous labyrinth – hair cells
  - Vibrations into nerve impulse
  - Cochlea, Vestibule, Semicircular canal
  - Balance – utricle, saccule
  - Oval window, round window
ICD-9-CM: Sense Organs

- Alphabetic index; Tabular List
- Chapter 6: Diseases of Nervous System and Sense Organs
  - Disorders of the Eye and Adnexa
  - Diseases of the Ear and Mastoid Process
- Chapter 2: Neoplasms

Eye and Ocular Adnexa

- Infection and Inflammation
- Neoplastic disease
- Injury
- Glaucoma
- Cataracts
- Retinopathy
- Retinal detachment
- Strabismus

Ear and Mastoid Process

- Diseases of the Ear and Mastoid Process
- Infectious and inflammation
- Neoplastic disease
- Injury
- Vertigo
- Hearing loss
- Congenital disorders
CPT®: Eye and Ocular Adnexa

- Eyeball
  - evisceration
  - exenteration
  - enucleation
- Secondary Implant(s) Procedures

CPT®: Eye and Ocular Adnexa

- Intraocular Lens Procedures (IOL)
  - Cataract removal with IOL
  - Intracapsular
  - Extracapsular
  - IOL exchange

CPT®: Eye and Ocular Adnexa

- Ocular Adnexa
  - Strabismus
    - horizontal
    - vertical
    - transposition
CPT®: Eye and Ocular Adnexa

- Operating Microscope
  - Most procedures on the eye are performed with a microscope and are included in the procedure code.
  - Do not report 69990 with 65091-68850

CPT®: Auditory System

Auditory System

- Removal foreign body from external auditory canal - both ears

CPT®: Auditory System

Middle Ear

- Tympanostomy
- Mastoidectomy; complete
  - modified radical
  - radical
- Tympanoplasty
CPT®: Auditory System

Inner Ear
- Labyrinthectomy
- Temporal Bone, Middle Fossa Approach
- Microsurgery

CPT®: Auditory System Medicine Section
- Special Otorhinolaryngologic Services
- Otolaryngologic examination under general anesthesia
- Vestibular Function Tests
- Audiologic Function Tests with Medical Diagnostic Evaluation

Anesthesia
Definition

Anesthesia is a state in which the patient feels no pain

Organization of Codes

Organized by anatomical location

- Head
- Neck
- Thorax
- Intrathoracic
- Spine and Spinal Cord
- Upper Abdomen
- Lower Abdomen
- Perineum
- Pelvis
- Upper Leg
- Knee and Popliteal Area
- Lower Leg
- Shoulder and Axilla
- Upper Arm and Elbow
- Forearm, Wrist, and Hand
- Radiological Procedures
- Burn Excisions or Debridement
- Obstetric
- Other Procedures

Finding the CPT® Code

- Start in the Index
- Look up Anesthesia
  - Anatomical location
  - Type of surgery
  - Surgical approach
Types of Anesthesia

• Local
  – Included in CPT® code
  – No separate anesthesia code

• MAC - Monitored Anesthesia Care
  – Decreased awareness

• Regional
  – Blocks
  – Spinals
  – Epidurals

• General

Anesthesia Terminology

• One-Lung Ventilation (OLV)
• Pump Oxygenator
• Intraperitoneal – within the peritoneum
• Extraperitoneal/Retroperitoneal - space in the abdominal cavity behind the peritoneum

Anesthesia Guidelines

• Services included with the anesthesia code:
  – Preoperative visits
  – Postoperative visits
  – Anesthesia during the procedure
  – Administration of fluids/blood
  – Usual monitoring
    • Unusual forms include CVP, Arterial line insertion, and Swan-Ganz and are coded separately
Physical Status Modifiers

- Assigned by the provider
- Coder would need to look for a diagnosis to report it
- Documented in anesthesia record

P1 - normal healthy
P2 - mild systemic disease
P3 - severe systemic disease (1 unit)
P4 - constant threat to patients life (2 units)
P5 - not expected to survive w/o surgery (3 units)
P6 - declared brain-dead patient

Qualifying Circumstances

- + 99100 – under 1 or over 70
- + 99116 - complicated by hypothermia
- + 99135 - complicated by controlled hypotension
- + 99140 - complicated by emergency

Modifiers

HCPCS Level II
AA - Performed by anesthesiologist
AD - Medically supervised by physician
QK - Medically directing 2-4 concurrent procedures (cases happening at the same time)
QS - MAC (deep sedation)
QX - CRNA service medically directed
QY - medically directing CRNA single case
QZ - CRNA w/o medical direction
CPT® Modifiers

53 – Discontinued Procedures
   – Used if surgeon discontinues the procedure

59 - Distinct procedural services
   – Example: General anesthesia during surgery, then an epidural is placed for post op pain management.

Additional Procedures

- CVP – central venous catheter
  - Monitoring
  - Quick administration
- Arterial Line Insertion
  - Based on technique used
- Swan-Ganz
  - Included if done through the CVP
  - Separate vessels code for both
Radiologic Projections

- Oblique – slanting, neither frontal or lateral
- Lateral – side view, X-ray beam travels through the side of the body
- Anteroposterior – X-ray beam enters the body through the front and exits through the back
- Posteroanterior – X-ray beam enters the body through the back and exits through the front
- Cone – focused or spot view

Additional Terms

- Proximal – closer to the point of attachment to the body
- Distal – away from the point of attachment to the body
- Flexion – bending
- Extension – straightening

Diagnosis Coding

- Code the definitive diagnosis
- Code signs and symptoms if no definitive diagnosis is available
- Diagnostic tests
  - Code sign or symptom that prompted the test
  - Do not code questionable, rule out, or probably diagnoses.
- Routine radiology
  - V72.5 Radiological examination, NEC
CPT® Subsections

• Diagnostic Radiology (Diagnostic Imaging)
• Diagnostic Ultrasound
• Radiologic Guidance
• Breast, Mammography
• Bone/Joint Studies
• Radiation Oncology
• Nuclear Medicine

Guidelines

• Supervision and Interpretation (S & I)
  – Interventional radiologic procedures
  – Report two codes:
    • Surgical code; or code from the medicine section
    • Radiologic supervision and interpretation

• Administration of Contrast Material
  – Contrast material administered intravascularly, intra-articularly or intrathecally
  – Oral and/or rectal contrast does not qualify

Modifiers

• Technical Component (TC)
  – Equipment
  – Overhead
    • Supplies
    • Room
    • Gowns

• Professional Component (26)
  – Reading and interpretation
Diagnostic Radiology (Diagnostic Imaging)

- Anatomical organization

- Radiologic procedures include:
  - Standard X-rays
  - MRIs
  - CTs

Code Selection:
- Anatomical location
- Type of procedure
- Number of views
- Type of view (AP, PA, etc)
- Laterality (unilateral, bilateral)
- Contrast material

Heart – Subsection Guidelines

- Heart
  - Stress
    - Cause the heart to work harder
  - Cardiac MRI
    - Physiologic evaluation of the cardiac function
    - Velocity flow mapping
  - Cardiac CT
    - Coronary calcium
    - Congenital heart disease
Vascular Procedures – Subsection Guidelines

• Aorta and arteries
  – Aortography – imaging of aorta and branches
  – Angiography – imaging of arteries

• Veins and lymphatics
  – Lymphangiography – visualization of lymphatics
  – Splenoportography – injection of contrast into the spleen to visualize the port vessel of the portal circulation
  – Venography – imaging of veins

Vascular Procedures

• Transcatheter procedures
  – Supervision and interpretation codes
  – Code with codes from:
    • Cardiovascular section
    • Medicine section

Other Procedures

76000  Fluoroscopy (separate procedure), up to one hour physician or other healthcare professional time other than 71023 or 71034 (eg, cardiac fluoroscopy)

76001  Fluoroscopy, physician or other healthcare professional time more than 1 hour, assisting a nonradiologic physician (eg, nephrolithotomy, ERCP, bronchoscopy, transbronchial biopsy)
Diagnostic Ultrasound

• High frequency sound waves to look at organs and other structures inside the body

• Used to view:
  – Heart
  – Blood vessels
  – Kidneys
  – Other organs
  – Fetus (during pregnancy)

Diagnostic Ultrasound

• Required:
  – Permanently recorded images with measurements
  – Final written report for the patient’s medical record
  – Exception – biometric measure

Diagnostic Ultrasound

• Anatomic regions
  – Complete – each element listed in parenthesis within the code description
  – Limited – reported if less than complete is performed.
  – Not reported together

• Definitions
  – A-mode
  – M-mode
  – B-scan
  – Real-time scan
Pelvis Ultrasound

• Obstetrical
  – Pregnant uterus
  • Review definitions in guidelines
  – Fetal
    • Look for what specifically is being looked at (e.g., umbilical artery in 76820)

• Nonobstetrical

Ultrasonic Guidance

Includes guidance for:

  – Pericardiocentesis
  – Endomyocardial biopsy
  – Vascular access
  – Parenchymal tissue ablation
  – Intrauterine fetal transfusion or cordocentesis
  – Needle placement
  – Chorionic villus sampling
  – Amniocentesis
  – Aspiration of ova
  – Placement of radiation therapy fields

Radiologic Guidance

• Fluoroscopic

• Computed Tomography (CT)

• Magnetic Resonance (MRI)

• Other
Breast, Mammography

- Computer aided detection (CAD)
- Mammary ductogram or galactogram
- Mammography
  - Screening
  - Diagnostic

Bone/Joint Studies

- Bone age studies
- Bone length studies
- Osseous survey
- Joint survey
- Bone mineral density studies
- Bone marrow blood supply

Radiation Oncology

- Consultation: Clinical Management
- Clinical Treatment Planning
- Medical Radiation Physics, Dosimetry, Treatment Devices, and Special Services
- Stereotactic Radiation Treatment Delivery
- Other Procedures
  - Radiation Treatment Delivery
  - Neutron Beam Treatment Delivery
- Radiation Treatment Management
  - Proton Beam Treatment Delivery
  - Hyperthermia
- Clinical Intracavitary Hyperthermia
  - Clinical Brachytherapy
Nuclear Medicine

- Diagnostic - Use of small amounts of radioactive material to examine organ function
  - Thyroid function (endocrine)
  - Renal (Gastrointestinal System)
  - Bone (Musculoskeletal System)
  - Heart (Cardiovascular system)
  - Brain (Nervous System)

- Therapeutic – uses radioactive material to treat cancer and other medical conditions affecting the thyroid gland

Pathology and Laboratory

Regulatory Terms

Clinical Laboratory Improvement Amendment (CLIA)
- CMS issues a waiver
- Approximately 80 tests
- Little risk of error
- For more info., see http://www.cms.hhs.gov/CLIA/10_Categorization_of_Tests.asp

Advance Beneficiary Notice (ABN)
- Non covered laboratory tests
- Patient is responsible for payment
- For more info., Web search “CMS-R-131”
Modifiers

- **90** Reference or Outside Laboratory
  - Billed by physician but performed by an outside laboratory
- **91** Repeat clinical diagnostic lab test
  - Same test same day
  - Not used if due to error
  - Not used if there is a better code for a series of tests
- **92** Alternative laboratory platform testing
  - Portable test kit
  - Single use disposable chamber
- **99** Multiple modifiers

Organ or Disease-Oriented Panels

- Group of tests commonly ordered together
- All tests in the panel must be performed
- Additional tests can be coded also
- Some panels are included in other panels and should not be coded separately
- Be on the look out for “or” “and”

Definitions

- Qualitative
  - What is present
- Quantitative
  - How much is present
- Chromatography
  - Laboratory technique used to separate mixtures
    - Mobile phase
    - Stationary phase
Evocative Suppression Testing

- Baseline and subsequent measurement
- Supplies and drug billed separately
- Physician attendance
  - Use Prolonged care codes
- Prolonged infusion codes from Medicine section

Consultations

- Requested by attending physician
- Rendered by pathologist
- Written report provided
- Patient not present
  - Lab test
  - Specimen
  - Slide

Chemistry

- Quantitative unless specified otherwise
- Same analyte in multiple specimens
- Same analyte in multiple specimens
- Molecular diagnostics
  - Coded by procedure not analyte
Laboratory Tests

- Hematology and Coagulation
- Immunology
- Microbiology
- Anatomic Pathology

Cytopathology

- Study of cells for disease
- Obtained by several methods
  - Washing or brushing
  - Smears
  - Fine needle aspiration

Cytogenetic Studies

- Study of cells for inherited disorders
- Must use modifiers from Appendix I "Genetic Testing Code Modifiers," also
Surgical Pathology

- Specimen – tissue sample
  - Has to be separately identifiable
- Divided into levels of progressive complexity
  - Level I – gross
  - Level II-IV gross and microscopic
- Additional codes for special stains

Pathology Consultation

Four types of consultations:

1. Report on prepared slides
2. Report on tissue requiring prep of slides
3. Review records and specimen
4. Consultation during surgery
   - Frozen sections
   - Cytology examination

Evaluation and Management
ICD-9-CM Coding

• Primary diagnosis – reason for the visit

• Signs and Symptoms
  – Code only if no definitive diagnosis is stated
  – Routinely associated with a disease process should not be coded separately

CPT® Coding

1. Select the category or subcategory of service and review the guidelines;
2. Review the level of E/M service descriptors and examples;
3. Determine the level of history;
4. Determine the level of exam;
5. Determine the level of medical decision making; and
6. Select the appropriate level of E/M service.

Categories and Subcategories

<table>

</table>
New vs. Established Patients

- New – has not received any face-to-face professional services from the physician/qualified health care professional, or another physician/qualified health care of the exact same specialty/subspecialty within the group practice, within the last three years
- Established – has received face-to-face services in the last three years

Office or Other Outpatient Services

- Provided in the physician's office or other outpatient clinic or ambulatory facility
- New patient
- Established patient

Observation

- Hospital Observation Services
  - Patient’s designated or admitted to observation status in the hospital
  - No CPT® guideline on length of observation stay
- Observation Care Discharge Services
  - If discharge is on date other than date admitted to observation
- Subsequent Observation Care
  - Patient is seen on a date other than the date of admit or discharge to observation
Hospital Inpatient Services

- Codes used for inpatient facility and partial hospitalization
- Use codes 99234-99236 for admit/discharge on same date
- Subsequent hospital care codes used for subsequent visits while admitted
  - Includes reviewing medical record, test results, etc

Hospital Discharge Services

- Codes are based on time
- Includes time spent with the final exam, paper work, writing prescriptions, talking with patient’s family, etc.
- Parenthetical notes
  - How to code for concurrent care on the discharge date
  - Discharge of a Newborn see code 99463

Consultations

- Consultations
  - Service provided by a physician whose opinion or advice regarding evaluation and/or management of a specific problem is requested by another physician or appropriate source
- Divided by location
- Three R’s to meet consultation criteria
Consultations

Medicare:

- Office Consultations
  - Report with new and established patient codes

- Inpatient Consultations
  - Report with initial hospital care codes for the first encounter regardless if performed by the admitting physician.
  - Use Modifier AI for the Principal Physician of Record

Emergency Department

- Does not distinguish between new/established
- Facility must be hospital-based and available 24 hours a day
- Physician direction of EMS emergency care, advanced life support

Critical Care Services

- Critically ill or injured
  - Acutely impairs one or more vital organ systems such that there is a high probability of imminent or life threatening deterioration in the patient condition.
  - Services included in critical care described in critical care guidelines.
Critical Care Services

- Services provided in a critical care unit to a patient who is not considered critically ill are reported with other E/M codes.
- Guidelines contain instructions for coding
  - Pediatric Critical Care
  - Neonatal Critical Care
- Critical Care and other E/M services may be coded on the same date by the same provider.

Critical Care Services

- Guidelines list services inclusive to critical care
  - May not be reported separately
  - Refer back to list to avoid unbundling services
  - Beneficial to highlight each of the CPT® codes listed in the guidelines

Nursing Facility Services

- Nursing Facility Services
  - Nursing facility
  - Psychiatric residential treatment center
  - Divided into Initial and Subsequent
- Nursing Facility Discharge
  - Similar to hospital discharge – instructions for care, prescriptions, etc.
- Annual Assessment
  - Annual assessment required by law
Domiciliary, Rest Home, or Custodial Care Services

• Also includes Assisted Living
• Physician see patient in one of these types of facilities
  – No medical component
• Either new patient or established patient

Domiciliary, Rest Home, or Home Care Plan Oversight Services

• Physician provides oversight of the patient’s care plan
• Review the case management plan
• Write new orders
• Make a new care plan

Home Services & Prolonged Services

• Home Services
  – Seen in home by physician
  – Separated by new and established patient
• Prolonged Services
  – Direct patient contact or without direct patient contact
  – Settings are office/outpatient and inpatient
  – Most are add-on codes
    • Exception is Standby Code
Standby Services

- Used to report time when a provider is on standby at the request of another provider
- Only report for more than 30 minutes duration
- Reported with additional units for each additional 30 minutes
- Do not report if the period of standby results in the performance of a procedure

Case Management & Medical Team Conference

- Case Management Services
  - Anticoagulant Management
    - Receive INR testing
    - Alter dosage
- Medical Team Conference
  - Requires three healthcare professionals
  - Divided by direct contact or without direct contact

Care Plan Oversight Services

- Home Health Agency
- Hospice
- Nursing Facility
  - Billed on a monthly basis
  - For the amount of time physician spends overseeing care of patient
Preventive Medicine Services

- Annual Physical Exam
- Divided by new and established patient and by patient’s age
- If abnormality is encountered and is significant to require additional work
  - Appropriate code from 99201-99215 reported with modifier 25 appended to the office/outpatient code

Counseling Risk Factor Reduction and Behavior Change Intervention

- For patient without symptoms or established illness
- No distinction between new and established patient
- Preventive Medicine, Individual Counseling
- Behavior Change Intervention
- Preventive Medicine, Group Counseling

Non-Face-to-Face Physician Services

- Telephone Services
  - Must be provided by a physician
  - Based on amount of time
  - Patient must be established
- On-Line Medical Evaluation
  - Reported only once for the same episode of care during a 7-day period
  - Must be provided by a physician
Special Evaluation and Management Services

- Basic Life and/or Disability Evaluation Services
- Work Related or Medical Disability Evaluation Services
- Specific guidelines under each code

Newborn Care Services

- Newborn Care Services
  - Newborn care age 28 days or less
  - Separated by location and by initial or subsequent visits
- Delivery or Birthing Room Attendance and Resuscitation Services
  - Attendance at delivery at request of delivering physician

Inpatient Neonatal Intensive Care
Pediatric & Neonatal Critical Care

- Pediatric Critical Care Patient Transport
- Inpatient Neonatal and Pediatric Critical Care
- Initial and Continuing Intensive Care Services
Inpatient Neonatal and Pediatric Care Services

Defined by age of patient:
- Neonates 28 days of age or less
- Infant or young child 29 days through 24 months of age
- Young child two through five years of age

Initial and Continuing Intensive Care Services

- Used to report services to a child who is not critically ill but requires intensive observation and frequent interventions
- 99477 used for Initial Hospital Care
- 99478-99480 used for Subsequent Intensive Care
  - Code selection based on the present body weight of the child

Evaluation and Management Coding Leveling

1. Select the category or subcategory of service and review the guidelines;
2. Review the level of E/M service descriptors and examples;
3. Determine the level of history;
4. Determine the level of exam;
5. Determine the level of medical decision making; and
6. Select the appropriate level of E/M service.
E/M Leveling

• 1995 vs. 1997 Guidelines
  – Main difference – exam component

• Seven components to consider
  – Relates to the level of work performed by the physician
    ▪ History
    ▪ Exam
    ▪ Medical Decision Making
    ▪ Counseling
    ▪ Coordination of Care
    ▪ Nature of Presenting Problem
    ▪ Time

Key Components

  – Generally the influential factors in determining level of service
  – History
  – Exam
  – Medical Decision Making
    ▪ Influential in the level of service unless counseling dominates the encounter
    ▪ Categories/subcategories describe the number of key components required

History

• History of Present Illness (HPI)

• Chronological description of the patient’s illness
  – Location
  – Quality
  – Severity
  – Timing
  – Context
  – Modifying factors
  – Associated sign and symptoms
History

Review of Systems
(Inventory of Body Systems)

- Constitutional
- Musculoskeletal
- Eyes
- Integumentary
- Ears, nose, mouth, throat
- Neurological
- Cardiovascular
- Psychiatric
- Respiratory
- Endocrine
- Gastrointestinal
- Hematologic/lymphatic
- Genitourinary
- Allergic/Immunologic

History

- A single element cannot count towards the HPI and the ROS for the same patient encounter

- Example
  - Knee pain counted as location for HPI
  - Knee pain cannot count as musculoskeletal for ROS

History

- Past, Family and/or Social History (PFSH)
  - Past History
    - Review of patient’s past illnesses, operations, etc
  - Family History
    - Review of patient’s parents/siblings
  - Social History
    - Review of social factors, marital status, alcohol/drug habits
### Exam

- Examination – may be body areas or organ systems

#### Body Areas
- Head, including face
- Neck
- Chest, including breasts
- Abdomen
- Genitalia, groin, buttocks
- Back, including spine
- Each extremity

#### Organ Systems
- Eyes
- Ears, nose, mouth and throat
- Cardiovascular
- Respiratory
- Gastrointestinal
- Genitourinary
- Musculoskeletal
- Skin
- Neurologic
- Psychiatric
- Hematologic/lymphatic/immunologic
### Exam

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
<th>Body Areas or Organ Systems</th>
</tr>
</thead>
<tbody>
<tr>
<td>Problem Focused</td>
<td>A limited examination of the affected body area or organ system.</td>
<td>1 body area or organ system</td>
</tr>
<tr>
<td>Expanded Problem Focused</td>
<td>An extended examination of the affected body area or organ system and other symptomatic or related organ system(s).</td>
<td>2 – 7 body areas or organ systems – limited exam</td>
</tr>
<tr>
<td>Detailed</td>
<td>An extended examination of the affected body area(s) and other symptomatic or related organ system(s).</td>
<td>2 – 7 body areas or organ systems – detailed exam</td>
</tr>
<tr>
<td>Comprehensive</td>
<td>A general/multi-system examination or complete examination of a single organ system.</td>
<td>8 or more organ systems OR complete single organ system</td>
</tr>
</tbody>
</table>

### Medical Decision Making

- Thought process of the physician throughout the visit
- Three elements to consider
  - Number of management options
    - Minimal, limited, multiple, extensive
  - Amount and/or complexity of data to be reviewed
    - Minimal or none, limited, moderate, extensive
  - Risk of complications, morbidity, and/or mortality
    - Minimal, low, moderate, high

### Medical Decision Making Table

<table>
<thead>
<tr>

<td>Moderate</td>
<td>Moderate</td>
<td>Moderate complexity</td>
</tr>
<tr>
<td>Extensive</td>
<td>Extensive</td>
<td>High</td>
<td>High complexity</td>
</tr>
</tbody>
</table>
E/M Leveling

Contributing Components
- Counseling: risk factor reduction, patient/family education
- Coordination of Care: arrange follow up treatment not typically provided by the provider, eg., physical therapy
- Nature of Presenting Problem: Taken into consideration in the medical decision making portion of the encounter
- Time: If counseling/coordination of care dominates more than 50 percent of encounter, time may be considered as the controlling factor

Determine the Level of E/M

<table>
<thead>
<tr>

Determine the Level of E/M

Category: Office or Other Outpatient Services
Subcategory: Established Patient

Descriptors: “…which requires at least 2 of these three components.”
E/M Leveling

- Many factors to consider when determining a level of Evaluation and Management Service.
- Be sure to Review the Guidelines and code descriptions.

Modifiers

- **Modifier 24** Unrelated evaluation and management service by the same physician during a postoperative period.
- **Modifier 25** Significant, separately identifiable evaluation and management service by the same physician on the same day of the procedure or other service.
- **Modifier 32** Mandated Services
- **Modifier 57** Decision for surgery
Medicine

- Immunizations
- Vaccines, Toxoids
- Psychiatry
- Biofeedback
- Dialysis
- Gastroenterology
- Ophthalmology
- Otorhinolaryngology
- Cardiovascular
- Pulmonary
- Endocrinology
- Neurology
- Genetics
- Nutritional Therapy
- Acupuncture
- Moderate Sedation

Medicine

- Non-invasive Diagnostic Vascular Studies
- Allergy & Clinical Immunology
- Special Dermatological Procedures
- Physical Medicine & Rehabilitation
- Qualifying Circumstances for Anesthesia
- Home Health Procedures/Services

Medicine and ICD-9-CM

- Alphabetic Index to Diseases
- Tabular List
- Official Guidelines for Coding and Reporting
Medicine Guidelines

- Multiple Procedures
- Add-on Codes
- Separate Procedures
- Unlisted Service or Procedure
- Special Report
- Materials Supplied by Physician

Immune Globulins

- Immune globulins
- Botulinum antitoxin
- Cytomegalovirus (CMV) immune globulin
- Diphtheria antitoxin
- Hepatitis B immune globulin
- Rabies immune globulin
- Tetanus immune globulin

Vaccines and Toxoids

- Vaccines
- Vaccination
- Immunization
- Toxins
- Toxoids
Psychiatry

• Consultation
• Follow-up by consultant
  office visits
  rest home, domicile
  home
• Transfer of care – new or established pt.
• Diagnostic psychiatric evaluations

Dialysis

• Hemodialysis
• Miscellaneous Dialysis Procedures
• End-Stage Renal Disease Services (ESRD)
• Other Dialysis Procedures
• Age-specific, reported once per month
  outpatient; home services

Noninvasive Vascular Diagnostic Studies

• Cerebrovascular Arterial Studies
• Extremity Arterial Studies (Including Digits)
• Extremity Venous Studies (Including Digits)
• Visceral and Penile Vascular Studies
• Extremity Arterial-Venous Studies
• Duplex and Doppler
Allergy and Immunology

- Allergy
  - Allergy Testing
  - Allergen Immunotherapy
- Pulmonary Studies

Medical Genetics and Genetic Counseling Services

- Chromosome
- Gene
- Genetics
- Genetic counseling

Hydration

- Hydration, Therapeutic, Prophylactic, Diagnostic Injections and Infusions, and Chemotherapy and Other Highly complex Drug or Highly Complex Biologic Agent Administration.
- Time based codes
Non-Chemotherapy Complex Drugs and Substances

- Infusions – therapeutic, prophylactic or diagnostic
- Specific to time, technique, substances added and additional set-up
- Multiple drugs

Chemotherapy

Services included with chemotherapy:
- Use of local anesthesia
- Iv start
- Access to indwelling IV, subcutaneous catheter or port
- Flush at conclusion of infusion
- Standard tubing, syringes and supplies
- Preparation of chemotherapy agent(s)

Chemotherapy

- Paracentesis
- Thoracentesis
- Peritoneocentesis
- Intrathecal
- Ventricular or Intraventricular
Physical Medicine and Rehabilitation

Treatment plan
- Problem list
- Goals
- Physician review progress each 30 days
  Progress made – recorded
  Modify or discontinue therapy

Modalities

- Supervised
- Constant Attendance
- Diathermy, Vasopneumatic Devices, Therapeutic Procedures

Wound Care Management
Orthotic Management and Prosthetic Management

Active wound care
- Not to be reported with 11040-11047

Orthotic management and Prosthetic Management
- Orthotics
- Prosthetics
Medicine Section

- Acupuncture - Face-to-face time
- Osteopathic Manipulative Treatment (O.D.)
- Chiropractic Manipulative Treatment (CMT)

Education and Training for Patient Self-Management

Education and training
- Self Management
- How many in the group?

Telephone services – patient, parent, or guardian
- 24 hours
- 7 days

On-line Medical Evaluation

- On-line encounter or other electronic communication mode of the medical kind
- Includes all services provided
Special Services, Procedures and Reports

Miscellaneous services
• 99024 – “tracking”
• Mandatory on-call hospital personnel
• Patient encounters outside the normal posted business hours or special circumstances at the request of the patient.

Home Health Procedures/Services

Define home setting:
• Patient’s residence
• Assisted living apartments
• Group homes
• Nontraditional private homes
• Custodial care facilities or schools

Medication Therapy Management Services

Performed by a pharmacist
Documentation required:
• Patient history
• Current medications
• Recommendations
Category II Codes

- Used for performance measurement
- Facilitate data collection
- Use of these codes is optional
- Used to evaluate quality of care
- Alphanumeric: example: four digits and letter “F” – 2001F is Weight recorded

Category III Codes

- Data collection regarding new technology
- It is preferable to use these codes rather than an unlisted code.
- Alphanumeric listings, four digits and the letter “T” Example – 0085T Breath test for heart transplant rejection

CPT® Appendices

Appendix A – modifiers and description
Appendix B – summary of additions and deletions
Appendix C – clinical examples
Appendix D, E, F and G are summary lists
Appendix H – empty – refer to website
CPT® Appendices

Appendix I – Deleted in 2013
