AAPC Announcements

The AMA Has Shown Support for AAPC

The American Medical Association recently asked that AAPC be added as a Cooperating Party in the U.S. Department of Health and Human Services Committee responsible for development and maintenance of ICD-10 codes, guidelines, and descriptions. “We believe that AAPC has the necessary expertise, experience and can serve as the voice of physicians that is lacking in today’s Cooperating Parties,” said AMA’s CEO, James Madara, MD.

Certification Review Workshops

AAPC is pleased to announce one-day certification workshops, hosted by your local chapter. These workshops will provide the certification training you need, while promoting education through the chapter. Training will be available for the CPC, COC, CIC, CRC, CPMA, CPCO, and CPPM certification workshops. Ask your chapter officers for more details.

Product Updates

Up to 50% off Exam Prep

AAPC distance learning courses are a great way to get certified and advance your career in the business of healthcare. Save on a variety of training courses, including the CPC, COC, CIC, and more. Training includes the prep course, ICD-10 code set training, three practice exams, and certification exam. View pricing and available certifications at aapc.com.

Purchase a 2016 Exam & Save 50%
