TABLE OF RIS

Number of Diagnoses/Management Options	Points
Self-limited or minor (Stable, improved or worsening) → Maximum 2 points in this category.	1
Established problem (to examining MD); stable or improved	<mark>1 x 3</mark>
Established problem (to examining MD); worsening	2
New problem (to examining MD); no additional work-up planned →	3
New problem (to examining MD); additional work-up (e.g. admit/transfer)	4
Total	3

Image: Section of the sectin of the section of the section of the	Level of Risk	Presenting Problem(s)	Diagnostic Procedure(s) Ordered	Management Options Selected
problemsproblems• One stable chronic illness, eg, well controlled hypertension, non-insuli dependent diabetes, cataract, BPH • Acute uncomplicated illness or injury, eg, cystits, allergic thinitis, simple sprain• Non-cardiovscaular imaging studies • Non-cardiovscaular imaging studies • Clinical laboratory tests requiring arterial puncture • Skin biopsies• Mimor surgery with no identified risk 	Minimal		venipuncture • Chest x-rays • EKG/EEG • Urinalysis • Ultrasound, eg, echocardiography	Gargles Elastic bandages
mild exacerbation, progression, or side effects of treatmentcardiac acress test, fetal contraction stress test: Elective major surgery (open, identified risk factors' Two or more stable chronic illnesser ' Undiagnosed new problem with uncertain prognosis, eg, lump in breast · Acute illness with systemic symptoms, eg, pyelonephritis, eq, lung in breast · Acute complicated injury, eg, head injury with brief loss of consciousness: Oradioxacular imaging studies with cathetization · Obrain fluid from body cavity, eg lumbar puncture, thoracentesis, 	Low	problems • One stable chronic illness, eg, well controlled hypertension, non-insulin dependent diabetes, cataract, BPH • Acute uncomplicated illness or injury, eg, cystitis, allergic rhinitis, simple	pulmonary function tests • Non-cardiovascular imaging studies with contrast, eg, barium enema • Superficial needle biopsies • Clinical laboratory tests requiring arterial puncture	Minor surgery with no identified risk factors Physical therapy Occupational therapy
severe exacerbation, progression, or side effects of treatment contrast with identified risk factors percutaneous or endoscopic) with identified risk factors Acute or chronic illnesses or injuries that pose a threat to life or bodily function, eg, multiple trauma, acute MI, pulmonary embolus, severe respiratory distress, progressive severe rheumatid arthritis, psychiatric illness with potential threat to self or others, pertionitis, acute renal failure A na brup tchange in neurologic status, • Contrast with identified risk factors percutaneous or endoscopic) with identified risk factors • Discography • Discography • Parenteral controlled substances • Drug therapy requiring intensive monitoring for toxicity • Discography • Parenteral controlled substances • Discography • Discography • Decision not to resuscitate or to de- escalate care because of poor prognosis	Moderate	mild exacerbation, progression, or side effects of treatment • Two or more stable chronic illnesses • Undiagnosed new problem with uncertain prognosis, eg. lump in breast • Acute illness with systemic symptoms, eg. pyelonephicated injury, eg. head	cardiac stress test, fetal contraction stress test Diagnostic endoscopies with no identified risk factors Deep needle or incisional biopsy Cardiovascular imaging studies with contrast and no identified risk factors, eg, arteriogram, cardiac catheterization Obtain fluid from body cavity, eg lumbar puncture, thoracentesis,	Elective major surgery (open, percutaneous or endoscopic) with no identified risk factors Prescaiption dug management Therapeutic nuclear medicine IV fluids with additives Closed treatment of fracture or dislocation
eg, seizure, 11A, weakness, sensory High loss	High	severe exacerhation, progression, or side effects of treatment - Acute or chronic illnesses or injuries that pose a threat to life or bodily function, eg, multiple trauma, acute MI, pulmonary embolus, severe respiratory distress, progressive severe rheumatoid arthritis, psychiatric illness with potential threat to self or others, peritonitis, acute renal failure - An abrupt change in neurologic status, eg, seizure, TA, weakness, sensory	contrast with identified risk factors • Cardiac electrophysiological tests • Diagnostic Endoscopies with identified risk factors	percutaneous or endoscopic) with identified risk factors Emergency major surgery (open, percutaneous or endoscopic) Parenteral controlled substances Drug therapy requiring intensive monitoring for toxicity Decision to resuscitate or to de-

Amount and/or Complexity of Data Reviewed	Points
Lab ordered and/or reviewed (regardless of # ordered)	1
X-ray ordered and/or reviewed (regardless of # ordered)	1
Medicine section (90701-99199) ordered and/or reviewed	1
Discussion of test results with performing physician	1
Decision to obtain old record and/or obtain hx from someone other than patient	1
Review and summary of old records and/or obtaining hx from someone other than patient and/or discussion with other health provider	2
Independent visualization of image, tracing, or specimen (not simply review of report)	2
